DETAILED ACTION

1. The claims are objected to because bracket such as “[]” must not be used in the claims. Bracketing means for deleting materials inside the bracket.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-20 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-20 of copending Application No. 10/584,007. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant application claim is broader in every aspect than the patent claim and is therefore an obvious variant hereof.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-7, 13-16, and 18-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Takeuchi (JP06076958A).

Regarding claim 1, Takeuchi discloses an extracting step (3), a (first) transforming step (4), and a (second) transforming step (5).

Regarding claim 2, Takeuchi inherently includes a decoding step for decoding video signals into frames.

Regarding claim 3, Takeuchi utilizes an average value of the color signal $P(x,y)$.

Regarding claim 4, Takeuchi also extracts color information from a color region (see Figure 5).

Regarding claim 5, Takeuchi further shows a using step (7).

Regarding claim 6, Takeuchi utilizes an average value of the color signal $P(x,y)$.

Regarding claim 7, elements 5 and 7 in Takeuchi have gamma correction effect.

Regarding claim 13, the elements 4, 5 and 7 are synchronized with the video signal.

Regarding claim 14, see elements 7 and 10.

Regarding claims 15 and 16, see corresponding rejections as set forth above.

Art Unit: 2622

Regarding claims 18 and 19, see corresponding rejections as set forth above.

Allowable Subject Matter

6. Claims 8-12, 17 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lys et al. (6,717,376) shows an illumination control.

Morita et al. (7,234,814) shows a lighting system on a computer monitor.

M.E. Van Orden (2,665,419) shows a lighting system for a television receiver.
